TECHNICAL SKILLS:

Front-End: HTML5, CSS, Bootstrap, Tailwind, CSS, JavaScript, jQuery, React, UI/UX Design Principles.

Back-End: Node.js, MySQL

Version Control: Git, GitHub

Design Tools: Figma

LANGUAGES:

English (Intermediate),

Amharic(Native)

STRENGTHS

Eager to Learn New Skills:

As a person starting out, I am constantly seeking new ways to grow and expand my skill set.

Not Afraid of Failure:

A strong believer in the mantra that we learn from our mistakes.

Time Management:

I always set aside time to plan my week and distribute the workload by days to meet deadlines while maintaining my well-being.

Collaborative:

Playing on my college's hockey team taught me everything about being a team player.

PROFESSIONAL SUMMARY:

I am a fourth-year software engineering student at Jimma University, Ethiopia, with a strong passion for front-end development. I am proficient in HTML, CSS, JavaScript, jQuery, React, Bootstrap, Tailwind CSS, C++, Java, and Figma for UI/UX design, and I have a solid understanding of version control systems such as Git and GitHub. Through a class project, I gained practical experience by developing a responsive web application using React and Tailwind CSS, focusing on creating user-friendly interfaces with an emphasis on performance and accessibility. Recently, I started learning Node.js by undertaking projects that involve back-end development, which has expanded my skill set and understanding of full-stack development. Additionally, I have cloned various websites such as Apple and Netflix, which has enhanced my ability to replicate complex designs and functionality. I am an effective communicator and team player, capable of working collaboratively in diverse environments.

EDUCATIONS

Bachelor of Science in Software Engineering

Jimma University, Ethiopia

May 2022 – June 2026

Courses: Requirement Engineering, Software Architecture Design, Software Design Principles, Database Design and Management, Web Development, Other

EXPERIENCE:

Infant Immunization Monitoring System

Role: Front-End Development

Responsibilities:

- Developed a comprehensive immunization monitoring system.
- Built a responsive web application using React and Tailwind CSS.
- Collected requirements, designed the UI, and implemented front-end components.
- Integrated front-end with back-end services using Express and MySQL.
- Ensured cross-browser compatibility and responsiveness.
- Created and maintained detailed project documentation.

The Prodigy Internship

Role: Front-End Development

Responsibilities:

- Developed responsive web applications using React and Tailwind CSS.
- Designed and implemented front-end UI components.
- Ensured cross-browser compatibility and mobile responsiveness.
- Optimized front-end performance and user experience.

Sikar Yosef

4th year Software Engineer student

BlueSpark Business and Technology Internship (Ongoing)

Role: Full Stack Developer

Project: Inventory Management and Material Request System

Responsibilities:

- Led the development and maintenance of a full-stack web application for inventory management and material requests, handling both front-end and back-end using React, Node.js, and Express.
- Designed and implemented intuitive front-end UI components, ensuring a user-friendly experience.
- Integrated a MySQL database for tracking inventory and processing material requests.
- Managed the entire front-to-back integration, ensuring smooth interaction between the UI and server-side logic.
- Implemented authentication and role-based access control for secure user operations.
- Focused on system scalability, performance optimization, and cross-browser compatibility.
- Handled code reviews, debugging, and version control using Git throughout the project.
